

**Report  
on  
Employment-Unemployment  
Scenario among Different  
Social Groups**

**(2013-14)**

**Volume V**

सत्यमेव जयते

**GOVERNMENT OF INDIA  
MINISTRY OF LABOUR & EMPLOYMENT  
LABOUR BUREAU  
CHANDIGARH**

## **FOREWORD**

Employment-Unemployment Statistics is an important input for policy and planning purposes. After the advent of recent Global Economic Slowdown and its impact on employment in different countries, including India, the importance of Employment-Unemployment Statistics on regular & frequent intervals has increased manifold.

The present report is the fourth in the series of Annual Employment-Unemployment Surveys conducted by Labour Bureau. The first survey was conducted in 28 States/UTs by covering 300 districts in the country during the year 2010 for a fixed reference period of Financial Year 2009-10. The second and third survey was more comprehensive in terms of coverage as well as parameters estimated. The survey was conducted in all the States/UTs by covering all the districts in the country.

The present Fourth Annual Employment-Unemployment Survey has been conducted during the period January, 2014 to June, 2014 in all the 36 States/UTs by covering all the districts in the country. A moving reference period of last twelve completed months from the date of survey is used to derive various estimates of labour force.

The report deals with the Employment-Unemployment Scenario among various Social Groups. A detailed analysis of the labour force related parameters and its derivatives for various groups have been attempted in the report.

I am sure the report will be helpful for formulating policies and plans for the benefits of various social groups.

## **CHAPTER-I**

### **MAIN FINDINGS OF THE SURVEY**

- The present Report is based on the Fourth Annual Employment-Unemployment Survey 2013-14 conducted by Labour Bureau.
- The current Volume deals with the "Employment-Unemployment Scenario among different Social Groups 2013-2014" in the country.
- The survey has been conducted in all the States/UTs by covering all the districts.
- The field work was executed from January, 2014 to July, 2014.
- A total sample of 1,36,395 household schedules has been covered with a break up of 83,385 households in the rural sector and 53,010 households in the urban sector.
- From the households covered, 6,80,392 members are surveyed out of which 4,20,239 members reside in rural households and rest 2,60,153 in the urban households.
- The households have been classified based into four social groups, viz., Scheduled Castes (SC), Scheduled Tribes (ST), Other Backward Classes (OBC) and Others category.
- The labour force estimates for various social groups are derived based on two approaches namely Usual Principal Status (UPS) approach and Usual Principal and Subsidiary Status (UPSS) approach.
- All the Labour Force related tables are generated for the persons aged 15 years and above only.
- The survey results show that 41.1 per cent households belong to the OBC category followed by 30.4 per cent under Others category,

18.8 under SC category and the rest 9.6 per cent belong to the ST category at All India level.

- All the households under study are put in five categories on the basis of number of employed members in the household.

*(in per cent)*

<b>Particulars</b>	<b>None</b>	<b>1 person</b>	<b>2 persons</b>	<b>3 persons</b>	<b>4 &amp; above persons</b>
Rural	4.1	42.6	33.4	12.7	7.2
Urban	5.7	54.8	27.1	9.1	3.3
Rural + Urban	4.6	46.3	31.5	11.6	6.1

- At All India level, highest proportion of households are having 1 employed person under all the four social groups.
- In case of rural areas, 10.6 per cent of the ST households are having 4 and above employed members in the household.
- The Labour Force Participation Rate for different social groups based on UPS and UPSS approach is as follows:

*(in per cent)*

<b>Approach</b>	<b>SC</b>	<b>ST</b>	<b>OBC</b>	<b>Others</b>
UPS	54.6	60.8	53.1	47.8
UPSS	58.3	66.4	56.2	49.8

- Female LFPR is significantly lower among all the four social groups as compared to LFPR for male category under the Usual Principal Status approach. At All India level, highest female LFPR is estimated to be 38.8 per cent under ST category as compared to 80.8 per cent under the male category.

- The Worker Participation Ratio (WPR) for different social groups based on UPS and UPSS approach is as follows:

*(in per cent)*

<b>Approach</b>	<b>SC</b>	<b>ST</b>	<b>OBC</b>	<b>Others</b>
UPS	52.0	58.1	50.5	45.3
UPSS	56.5	65.0	54.3	47.7

- The Worker Participation Ratio (WPR) in rural areas is higher as compared to the urban areas. At All India level, in rural areas, highest WPR is estimated to be 59.7 per cent under ST category as compared to 48.1 per cent in urban areas under the same category based on the UPS approach.
- Under Others category, at All India level, the female WPR is estimated to be 16.6 per cent under the UPS approach as compared to 69.9 per cent for male category in urban areas.
- The Unemployment Rate (UR) for different social groups based on UPS and UPSS approach is as follows:

*(in per cent)*

<b>Approach</b>	<b>SC</b>	<b>ST</b>	<b>OBC</b>	<b>Others</b>
UPS	4.6	4.5	4.8	5.3
UPSS	3.1	2.1	3.4	4.2

- At All India level, based on Usual Principal Status approach for the Others category, the Unemployment Rate is 5.3 per cent followed by 4.8 per cent under OBC category, 4.6 per cent under SC category and 4.5 per cent under ST category.
- In both rural and urban areas, female Unemployment Rate is higher as compared to the male Unemployment Rate under all the four social groups based on the UPS approach.

- Under the current survey, workers who were available for the entire 12 months during the reference period are categorised in four categories according to the period for which they get work based on Usual Principal & Subsidiary Status Approach.
- Distribution of workers available for 12 months under different social groups based UPSS approach is as follows:

*(in per cent)*

<b>Particulars</b>	<b>worked for 12 months</b>	<b>worked for 6-11 months</b>	<b>worked for 1-5 months</b>	<b>did not get any work</b>
Scheduled Caste	52.5	42.9	1.2	3.4
Scheduled Tribe	48.2	47.4	2.0	2.4
Other Backward Class	60.0	35.2	1.1	3.7
Others	70.3	24.6	0.8	4.3

- Based on the Usual Principal & Subsidiary Status Approach, at All India level highest 4.3 per cent of the workers available for 12 months under Others category did not get any work during the reference period.

## CHAPTER-II

### EMPLOYMENT-UNEMPLOYMENT SCENARIO AMONG DIFFERENT SOCIAL GROUPS

#### Introduction

**2.1** The Annual Employment-Unemployment Surveys conducted by Labour Bureau throws information of labour force and its derivatives for various social groups namely Scheduled Caste (SC), Scheduled Tribe (ST), Other Backward Class (OBC) and Others category. This report primarily deals with the Employment-Unemployment Scenario during 2013-14 as a part of Fourth Annual Employment – Unemployment Survey among persons belonging to the four social groups, viz., Scheduled Caste (SC), Scheduled Tribe (ST), Other Backward Class (OBC) and Others category. The State-wise distribution of

households among different social groups for States/UTs is presented in Tables 1 and 2 (Annexure IV).

#### Distribution of Households by Social Groups

**2.2** The survey results show that at overall level, about 41 per cent of households belong to Other Backward Class category followed by 30 per cent under the Others category, 19 per cent under the Scheduled Castes category and the rest 10 per cent households under the Scheduled Tribes category. Table 2.1 shows the distribution of the households among different social groups in rural, urban and rural + urban sectors.

**Table 2.1: Distribution of households (lhs) by social group (in %)**

Particulars	SC	ST	OBC	Others
Rural	21.3	11.8	41.6	25.3
Urban	13.0	4.5	40.0	42.4
Rural + Urban	18.8	9.6	41.1	30.4

**2.3** In the rural sector, a trend, similar to the one observed at the All India level (rural + urban) is visible. In rural areas, the proportion of households under Other Backward Classes category is the highest with 42 per cent

followed by 25 per cent under the Others category, 21 per cent under the Scheduled Castes category and the rest 12 per cent under the Scheduled Tribes group.

**Figure 1: Distribution of households by social group**

**2.4** In case of urban sector, the Others category households have maximum proportion i.e. about 42 per cent followed by 40 per cent households under the Other Backward Classes category, 13 per cent households under the Scheduled Castes category and 5 percent households come under the Scheduled Tribes category at All India level.

### **Households by Number of Employed Members**

**2.5** The households studied under the survey have been classified based on the number of employed members aged 15 years and above in the household. Accordingly, all the households under study are put in five categories as follows:

1. None employed member household;
2. 1 employed member household;
3. 2 employed members' household;
4. 3 employed members' household;
5. 4 & above employed members' household.

**2.6** The results show that at overall level, about 46 per cent of the households are having 1 employed member followed by 32 per cent of the households having 2 employed member's. About 5 per cent of the households do not have even a single employed member.

**Table 2.2: Distribution of households (hhs) by number of employed persons aged 15 years & above (in %)**

Particulars	None	1 person	2 persons	3 persons	4 & above persons
Rural	4.1	42.6	33.4	12.7	7.2
Urban	5.7	54.8	27.1	9.1	3.3
Rural + Urban	4.6	46.3	31.5	11.6	6.1

**Figure 2: Distribution of households (hhs) by number of employed persons at overall level**

**2.7** A same trend is visible in both rural and urban areas also where; households with 1 employed person constitute highest (about 43 per cent) proportion followed by households with 2 employed persons in case of rural areas. In urban areas, the proportion of households with 1 employed person is significantly higher (about 55 per cent) when compared to other types of households.

**2.8** Table 2.3 shows the distribution of households by number of employed members among different social groups. At all India level, about 45 per cent households under the Scheduled Caste category are having 1 employed member followed by 33 per cent having 2 employed members'. Proportion of households having 1 employed member is highest in all the social groups except Scheduled Tribe. Among the Scheduled Tribes category, highest i.e. about 38 per cent of the households are having 2 employed members' followed by 35 percent having 1 employed member. Moreover,

Scheduled Tribe category has lowest (3.5 per cent) proportion of households having none employed member in the household.

**2.9** In rural areas, proportion of households having not even one employed member is lower than urban areas among all the four social groups. On the other hand proportion of households having 4 and above employed members' is higher in rural areas as compared to urban sector for all the social groups. Under Scheduled Tribe category, highest i.e. 10.6 per cent of the households have 4 and above persons employed.

**2.10** In urban areas, more than 50 per cent of households are having 1 employed member under all the four social groups. Under the Others category, about 56 per cent of households are having 1 employed member whereas proportion of households having 4 and above employed members is 2.8 percent which is lowest as compared to other groups.

**Table 2.3: Distribution of households (hhs) by number of employed based on social groups for persons aged 15 years & above (in %)**

Particulars	None	1 person	2 persons	3 persons	4 & above persons
<b>Scheduled Caste</b>					
Rural	3.6	42.7	34.6	12.5	6.6
Urban	4.0	54.6	27.3	9.8	4.3
Rural + Urban	3.7	45.2	33.1	11.9	6.1
<b>Scheduled Tribe</b>					
Rural	3.3	32.6	39.4	14.0	10.6
Urban	4.1	52.2	28.7	11.0	4.0
Rural + Urban	3.5	35.3	37.9	13.6	9.7
<b>Other Backward Class</b>					
Rural	3.9	42.3	33.4	13.3	7.2
Urban	5.4	53.6	28.1	9.5	3.5
Rural + Urban	4.3	45.6	31.9	12.2	6.1
<b>Others</b>					
Rural	5.1	47.9	29.5	11.2	6.3
Urban	6.7	56.4	25.9	8.3	2.8
Rural + Urban	5.8	51.4	28.0	10.0	4.8

**Figure 3: Distribution of households (hhs) by number of employed members based on social groups for persons aged 15 years & above at overall level (in %)**

## **Labour force Participation Rate (LFPR)**

**2.11** The LFPR is a measure of the proportion of a country's working age population that engages actively in the labour market, either by working or looking for work. It provides an indication of the size of the supply of labour available to engage in the production of goods and services. The breakdown of the labour force by gender, age and social group provides a profile of the economically active population within a country. This may be defined as the number of persons who are either working or seeking/available for work during the reference period. The results in the report are compiled for different social groups based on Usual Principal Status (ps) and Usual Principal & Subsidiary Status approach (ps+ss).

**2.12** At National level, the Labour Force Participation Rate for Scheduled Tribe category is highest with about 61 per cent followed by 55 per cent under the Scheduled Caste category, 53 per

cent for Other Backward Classes category and 48 per cent for Others category under the Usual Principal Status Approach.

**2.13** In case of both rural and urban sectors, LFPR for Scheduled Tribe category is highest with about 62 and 51 per cent respectively followed by Scheduled Caste category.

**2.14** As evident from the table, female labour force participation rate is relatively low as compared to male labour force participation rate. Female LFPR which is highest among all the four social groups is about 39 per cent for Scheduled Tribe category, for male category of persons also, the LFPR is highest for Scheduled Tribe category (81 per cent).

**2.15** A similar trend is visible under Usual Principal & Subsidiary Status Approach also where; Labour Force Participation Rate for Scheduled Tribe category is highest with about 66 per cent followed by 58 per cent under the Scheduled Caste category, 56 per cent for

Other Backward Classes category category at All India level. and 50 per cent for Others

**Table 2.4: Labour Force Participation Rate for persons aged 15 years & above according to Usual Principal Status Approach (ps) (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P
SC	74.4	31.0	56.0	75.1	21.2	49.3	74.5	28.8	54.6
ST	81.3	41.5	62.4	77.6	22.9	50.9	80.8	38.8	60.8
OBC	73.7	29.8	54.8	75.1	20.3	48.6	74.1	26.9	53.1
OTHERS	73.8	20.8	49.9	71.7	15.6	44.9	73	18.6	47.8

*M- Male; F-Female; P-Person*

**2.16** In case of rural sector, the proportion of LFPR under Scheduled Tribe category is highest with about 69 percent followed by 61 per cent under Scheduled Caste category, 59 per cent under Other Backward Classes category and 53 per cent under Others category based on Usual Principal & Subsidiary Status Approach.

**2.17** In case of urban sector also, the proportion of LFPR under Scheduled Tribe category is highest with about 52 percent followed by 50 per cent under

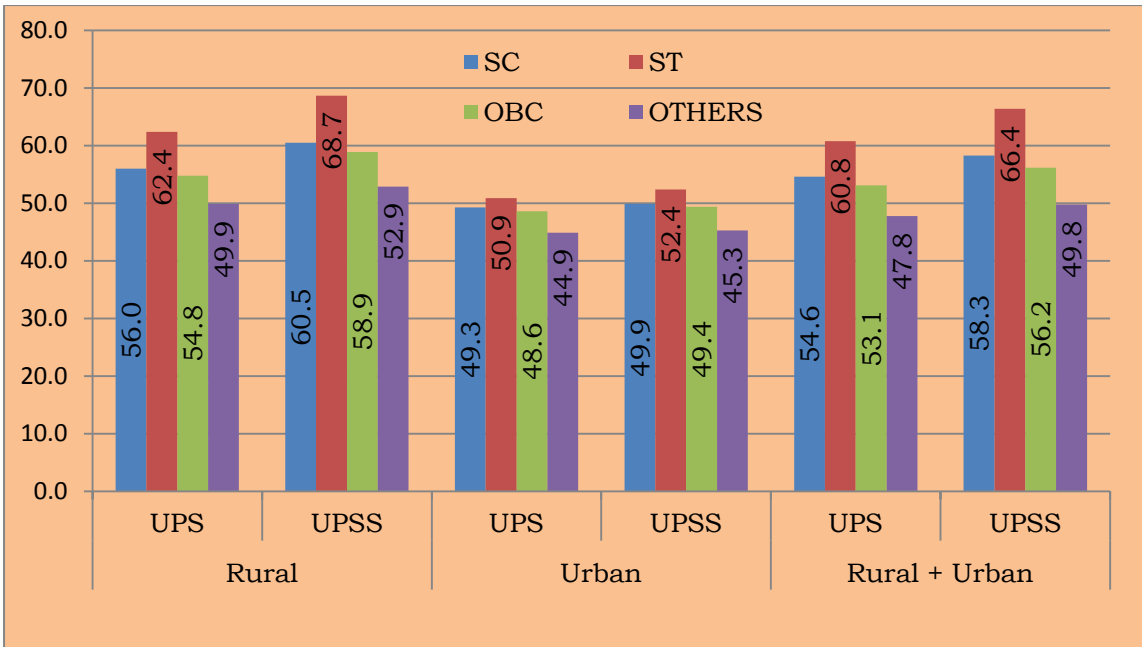

Scheduled Caste category, 49 per cent under Other Backward Classes category and 45 per cent under Others category based on Usual Principal & Subsidiary Status Approach.

**2.18** The proportion of both male and female LFPR is lowest under Others category base on Usual Principal & Subsidiary Status Approach. Under all the social groups except Scheduled Tribe, female LFPR is considerably low as compared to male counterparts in both rural and urban areas.

**Table 2.5: Labour Force Participation Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P

**Figure 4: Comparative Labour Force Participation Rate for persons aged 15 years & above according to UPS and UPSS Approach (in %)**

### Worker Population Ratio (WPR)

**2.19** As an important indicator, the employment-to-population ratio provides information on the ability of an economy to create jobs. Worker population ratio is defined as the number of persons employed per thousand

persons. Based on Usual Principal Status and Usual Principal & Subsidiary Status Approaches the worker population ratio for different social groups is presented in Table 2.6 and Table 2.7 respectively.

**Table 2.6: Worker Population Rate for persons aged 15 years & above according to Usual Principal Status Approach (ps) (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P
SC	71.5	29.3	53.5	71.7	19.0	46.4	71.5	26.9	52.0
ST	78.1	39.3	59.7	74.2	20.7	48.1	77.6	36.7	58.1
OBC	70.6	27.9	52.3	72.3	18.0	46.0	71.1	24.8	50.5
Others	70.5	19.1	47.3	69	13.3	42.4	69.9	16.6	45.3

*M- Male; F-Female; P-Person*

**2.20** At All India level, WPR is highest under Scheduled Tribe category with about 58 percent followed by 52 per cent under the Scheduled Caste category, 51 per cent for Other Backward Classes category and 45 per cent for Others category based on Usual Principal Status Approach.

**2.21** At sector level i.e. rural and urban sector also show similar types of results as shown at National level. It is observed that Scheduled Tribes category is leading among all the four social groups at both National and sector level.

**2.22** The proportion of female WPR is very less as compared to the male WPR under all the four

social groups based on Usual Principal Status Approach. Highest female WPR of about 37 per cent is observed under the Scheduled Tribe category whereas male WPR for the same social group is about 78 percent which is also highest among all the social groups.

**2.23** Table 2.7 shows that similar types of trends as seen under the Usual Principal Status Approach are observed in the Usual Principal & Subsidiary Status Approach also. Scheduled Tribe category constitutes the highest proportion of all the parameters viz. national level, social group wise, sector wise and gender wise.

**Table 2.7: Worker Participation Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach (ps+ss) (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P

OTHERS	72.5	24.7	51.0	69.4	14.2	43.0	71.3	20.3	47.7

M- Male; F-Female; P-Person

**Figure 5: Comparative Worker Participation Rate for persons aged 15 years & above according to UPS and UPSS Approach (in %)**

## Unemployment Rate

**2.24** The unemployment rate signifies the proportion of persons who are available for work but didn't get work during the reference period. It is a measure of the prevalence of unemployment and is calculated

as a percentage by dividing the number of unemployed persons by all persons currently in the labour force for the same age group. Based on Usual Principal Status Approach, the unemployment rate for different social groups is as follows:

**Table 2.8: Unemployment Rate for persons aged 15 years & above according to Usual Principal Status Approach (ps) (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P
SC	3.9	5.7	4.4	4.5	10.7	5.8	4.0	6.6	4.6
ST	4.0	5.1	4.3	4.4	9.5	5.5	4.0	5.5	4.5
OBC	4.1	6.4	4.7	3.8	11.5	5.3	4.0	7.6	4.8
Others	4.5	8.3	5.2	3.8	14.5	5.6	4.2	10.5	5.3

*M- Male; F-Female; P-Person*

**2.25** Based on the usual principal status approach, the unemployment rate at All India level is 5.3 per cent under Others category which is highest among all four social groups. In case of Other Backward Classes category, the unemployment rate is estimated to be 4.8 per cent followed by 4.6 per cent under Scheduled Caste category and the lowest 4.5 per cent under Scheduled Tribe category.

**2.26** In case of rural areas, Scheduled Tribe category has the lowest unemployment rate i.e. 4.3 per cent whereas it is highest under the Others category in rural areas. Whereas in urban areas, unemployment rate is lowest under Other Backward Classes category (5.3 per cent).

**2.27** While comparing gender wise unemployment rate at All India level under the Usual Principal Status Approach, it may be seen that there is wide variation among the male and female unemployment rate. In case of females, maximum unemployment rate is estimated to be 10.5 per cent under Others category whereas for male the same is 4.2 per cent under the same social group. In urban sector, the unemployment rate among females is highest with 14.5 per cent as compared to other groups.

**2.28** Table 2.9 shows that at National level, based on Usual Principal & Subsidiary Status Approach, unemployment rate in case of Scheduled Tribe category is 2.1 per cent followed by 3.1 per cent under Scheduled Caste

category, 3.4 per cent under Other Backward Classes category and Others category is having

highest unemployment rate of 4.2 per cent.

**Table 2.9: Unemployment Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach (ps+ss) (in %)**

Particulars	Rural			Urban			Rural + Urban		
	M	F	P	M	F	P	M	F	P
SC	2.7	2.7	2.7	3.9	8.9	5.0	2.9	3.6	3.1

OBC	2.7	3.6	2.9	3.4	10.0	4.8	2.9	4.9	3.4
Others	3.2	5.4	3.7	3.5	13.1	5.1	3.3	7.8	4.2

M- Male; F-Female; P-Person

**2.29** Highest unemployment rate is visible under Others category in both rural and urban areas whereas Scheduled Tribe category shows the lowest Unemployment Rate in both sectors.

four social groups except Scheduled Tribe. Under Scheduled Tribe category, female Unemployment Rate is 2.1 per cent whereas for male category it is 2.2 per cent. In case of Others category, female Unemployment Rate is more than double (7.8 per cent) of the same under male category (3.3 per cent).

**2.30** Female Unemployment Rate is higher than male Unemployment Rate under all the

**Figure 6: Comparative Unemployment Rate for persons aged 15 years & above according to UPS and UPSS Approach (in %)**

## UNDEREMPLOYMENT

**2.31** In the fourth Annual Employment-Unemployment Survey an attempt has been made to estimate underemployment. Based on the Usual Principal Status Approach, major time criterion is used to determine whether a person is employed or unemployed. Underemployment is a situation where persons are available for work and get work also but partially. In the report tables are

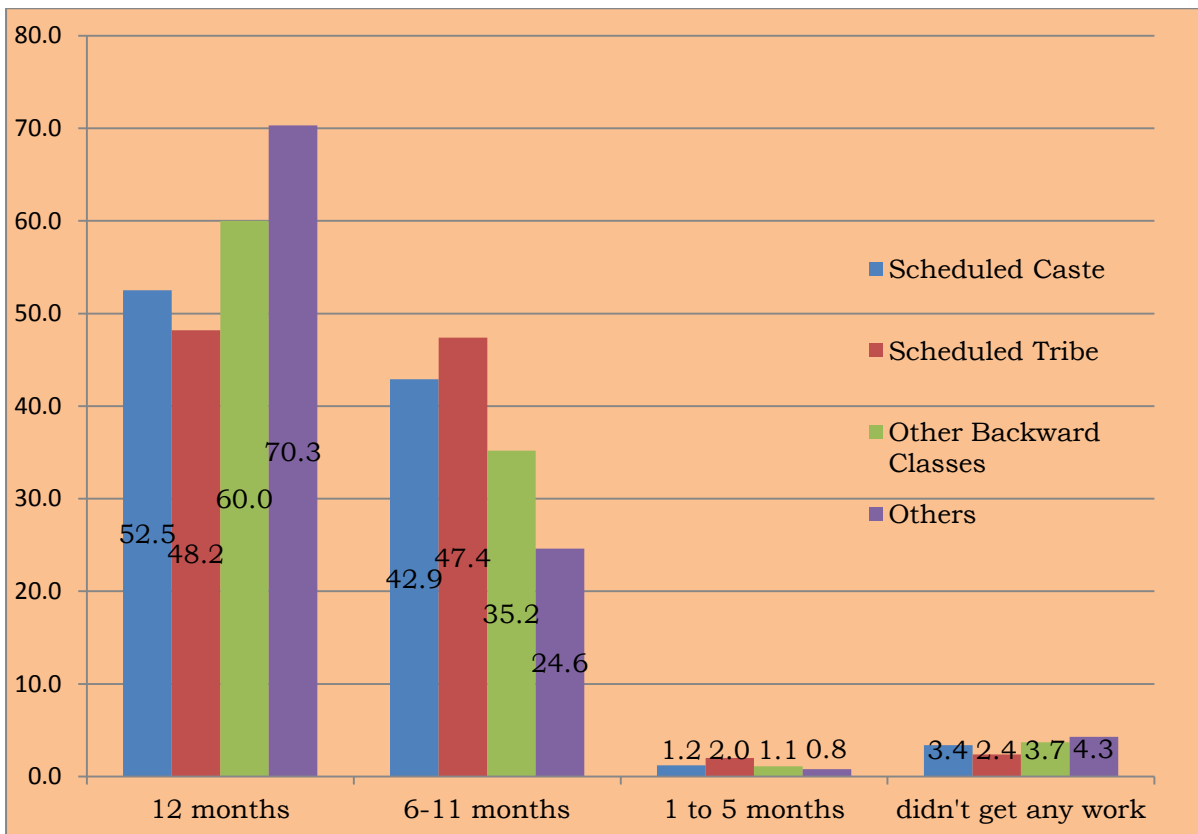

generated for those persons who were available for the entire 12 months during the reference period based on Usual Principal & Subsidiary Status Approach. The persons who were available for work for 12 months during the reference period are categorized as:

1. Worked for 12 months;
2. Worked for 6-11 months;
3. Worked for 1-5 months;
4. Did not get work.

**Table 2.10: Distribution of workers aged 15 years & above available for 12 months but actually worked according to Usual Principal & Subsidiary Status Approach (ps+ss) (in %)**

Particulars	Rural	Urban	Rural + Urban
	<b>Scheduled Caste</b>		
worked for 12 months	47.0	73.6	52.5
worked for 6-11 months	48.6	21.1	42.9
worked 1 to 5 months	1.4	0.6	1.2
did not get any work	3.1	4.6	3.4
	<b>Scheduled Tribe</b>		
worked for 12 months	44.7	70.9	48.2
worked for 6-11 months	51.0	23.8	47.4
worked 1 to 5 months	2.2	0.7	2.0
did not get any work	2.0	4.6	2.4
	<b>Other Backward Class</b>		
worked for 12 months	53.5	76.6	60.0
worked for 6-11 months	41.8	18.3	35.2
worked 1 to 5 months	1.4	0.4	1.1
did not get any work	3.3	4.7	3.7

Particulars	Rural	Urban	Rural + Urban
		<b>Others</b>	
worked for 12 months	62.0	82.6	70.3
worked for 6-11 months	33.0	12.1	24.6
worked 1 to 5 months	1.1	0.4	0.8
did not get any work	3.9	4.9	4.3

**Figure 7: Distribution of workers available for 12 months at overall level and actually worked (in %)**

**2.32** Table 2.10 shows that at overall level, Others category constitutes highest (70 per cent) of persons who worked for 12 months during the reference period followed by 60 per cent under the Other Backward Category, 52 per cent under the

Scheduled Caste and 48 per cent under the Scheduled Tribe category.

**2.33** In rural areas, 3.9 per cent of persons who were available for 12 months under the Others category did not get any work

followed by 3.3 per cent under Other Backward Category, 3.1 per cent under the Scheduled Caste Category and 2.0 per cent under the Scheduled Tribe category.

**2.34** In urban areas, proportion of persons who worked for 12 months is higher as compared to the rural areas. Under Others category, 83 per cent persons worked for 12 months as against 62 per cent in rural areas.

**CONCEPTS AND DEFINITIONS**

Important concepts and definitions used in the survey and relevant to this report are explained below.

**1.1 House:** Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

**1.2 Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

**1.3 Household size:** The number of members normally residing in a household is its size.

**1.4 Economic activity:** The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets.

**1.5** Thus the term 'economic activity' under the fourth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production

of goods and services for exchange,

- ii. Of the non-market activities,
  - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
  - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

**1.6 Activity status:** It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the

following three statuses during a reference period:

- i. Working or engaged in economic activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

**1.7** Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

**1.8** The three broad activity statuses have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
  - a) worked as an own-account worker (self-employed);
  - b) employer (self-employed);
  - c) worked in household enterprise as 'helper' (unpaid family worker);

d) worked as regular salaried/wage employee other than contract worker;

e) worked as contract worker;

f) worked as casual wage labour in public works;

g) worked as casual wage labour in other types of works;

- ii. not working but seeking or available for work (unemployed);

- iii. neither working nor available for work (not in labour force)

- i) attended educational institution;

- ii) attended domestic duties;

- iii) recipients of rent, pension, remittance, etc;

- iv) not able to work due to disability;

- v) Others (prostitutes, beggars, etc.);

**1.9** The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

**1.10 Workers (or employed):**

Persons who during the reference period are engaged in any economic activity or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical

disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

**1.11 Seeking or available for work (or unemployed):** Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

**1.12 Labour force:** Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

**1.13 Out of labour force:** Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of

the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

**1.14** It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

**1.15 Self-employed:** Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their

remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

**1.16** The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive

any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

**1.17 Regular salaried/wage employee other than contract workers:** Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

**1.18 Worked on contract basis:** As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose

of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

**1.19 Casual wage labour:** A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

**1.20 Different approaches for determining activity status:** The persons surveyed can be classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

**1.21 Usual activity status:** The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The

activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

**1.22** For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity

status so determined, the detailed activity status category of a person pursuing more than one such activity will be determined again on the basis of the relatively longer time spent.

**1.23 Subsidiary economic**

**activity status:** A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

## **SAMPLING DESIGN & ESTIMATION PROCEDURE**

### **Introduction**

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far three such surveys have been conducted and thereon reports released. The present one is the Fourth Annual Employment-Unemployment Survey in the series.

**2.4** In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in January, 2014 and completed in majority of the States/UTs by June, 2014. A

sample of about 1.36 lakh household schedules has been covered during the survey in 36 States/UTs.

**2.5 Sample Design:** A stratified multi-stage sample design has been adopted for the Fourth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

**2.6 Stratification:** Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

**2.7 Sample Size:** In all 36 States/UTs, a total sample of

12598 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7270 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5328 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

**2.8 Allocation of Sample to States/UTs:** Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 16 FSUs with a

minimum of 8 each in rural and urban areas.

**2.9 Allocation of State/UT level rural and Urban Stratum sample to districts:** The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 16 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

**2.10 Selection of FSUs:** For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

**2.11 Criteria for hamlet group/sub block formation:** Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

Approximate present population of the sample village/ urban block	No. of hg/sb to be formed (d)
Less than 1200 (no hamlet-group/sub block)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

**2.12** For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

Approximate present population of the sample village/ block	No. of hgs/ sbs to be formed (d)
Less than 600 (no hamlet-groups/sub blocks)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

### **2.13 Selection of hamlet groups/sub blocks:**

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

**2.14 Listing of households:** After determining the hamlet-groups/sub-blocks i.e. areas to be considered for listing, all the

households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

### **Formation of Second Stage Strata and allocation of households:**

**2.15** For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

### **2.16 Allocation of households:**

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

Second Stage Strata (SSS)	No. of members in the household aged 15 years & above
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & more

SSS	without hg/sb formation		with hg/sb formation in both rural & urban strata	
	Rural	Urban	hg1/sb1	hg2/sb2
h1	1	1	1	1
h2	2	3	2	2
h3	4	4	2	2
h4	3	2	1	1
<b>Total</b>	<b>10</b>	<b>10</b>	<b>6</b>	<b>6</b>

### 2.17 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

### 2.18 Shortfall of households to be compensated:

Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

**2.19** The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS having shortfall	priority order of SSS for
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

**2.20** If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

**2.21** For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

### Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D\* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

$z$  = size of selected sample village

$n$  = number of sample FSUs surveyed in a stratum

$H$  = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

$h$  = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

$x, y$  = observed value of characteristics  $x, y$  under estimation

$\bar{X}, \bar{Y}$  = estimate of population total  $X, Y$  for the characteristics  $x, y$

Under the above symbols,

$y_{tmidjk}$  = observed value of the characteristic  $y$  for the  $k$ -th household in the  $j$ -th second stage stratum of the  $d$ -th hg/ sb ( $d = 1, 2$ ) of the  $i$ -th FSU belonging to the  $m$ -th sub-sample for the  $t$ -th stratum.

### **Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)**

#### **Listing Schedule 'A'**

**Rural stratum:** For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where  $y_{i1}, y_{i2}$  are the total number of households possessing the characteristic  $y$  in hg's 1 & 2 of the  $i$ -th FSU respectively.

**Urban Stratum:** For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where  $y_{i1}, y_{i2}$  are the total number of households possessing the characteristic  $y$  in sub-blocks 1 & 2 of  $i$ -th FSU respectively.

**Schedule 'B':** (Employment – Unemployment Survey Schedule)

**Estimation formula for a rural stratum in a district:**

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

**Estimation formula for an urban stratum in a District:**

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

**Overall Estimate for Aggregates:**

Overall estimate for aggregates for a stratum ( $\hat{Y}_t$ ) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{tm}$$

**Overall Estimate of Aggregates at State/UT/all-India level:**

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_t$  over all strata belonging to the State/ UT/ All-India.

**Table (A1): Number of villages/UFS blocks allocated and actually surveyed for each State/UT****Rural+Urban**
